Shandong Avant New Material Technology Co., Ltd.
2802131

Tel.: +86-533-

Characteristics:

This product is white, spherical porous material, with good mechanical strength, in water and alkali powder, is the anthraquinone method to produce hydrogen peroxide special regeneration agent. In addition to the alkali adsorbed in the work fluid, the product has a strong regeneration ability for the degradation of work fluid.

Physical properties:

Specs.	3-5mm	Φ
Surface Area	≥180	m ² /g
Pore Volume	≥0.4	ml/g
Bulk density	≥0.6	g/ml
Crushing strength	≥120	N/p
